

ILLIA PAVELKO | +31 6 42 99 31 98 | pavelko.illia.dev@gmail.com | linkedin.com/in/illia-pavelko

Software Engineer with 3+ years of experience designing and delivering scalable applications and microservices. Skilled in working with small, fast-moving teams as well as larger organizations, with project experience across telecom, SaaS, and manufacturing. Focused on building reliable, maintainable systems and driving projects from design to production deployment and maintenance.

PROFESSIONAL EXPERIENCE

Odido (Enterprise Integrations Team) | Software Engineer Intern | HQ in Netherlands, The Hague (Sep 2025 – Present)

Odido is one of the largest telecom companies in the Netherlands, delivering enterprise-level digital infrastructure and services.

- Developed a **Java Spring Boot microservice** to synchronize data state between a 3rd-party API and internal systems, ensuring a **single source of truth** for business-critical information eliminating up to **95% of manual data reconciliation**
- Designed the solution using **event-driven architecture** with **Apache Kafka** and **Tyk Streams**, improving reliability and scalability of real-time integrations.
- Designed and maintained CI/CD pipelines with **ArgoCD**, automating deployment into **AWS** via **Kubernetes** and **Helm**. Extensive **unit and integration tests**, achieving **80% code coverage** integrated into the pipeline.

Tech Stack: Java 17, Spring Boot 3.5, Kafka, Tyk Streams, Git, Docker, ArgoCD, AWS, Kubernetes, Helm, JUnit, Mockito

TheQuickSport.com | Full Stack Developer | Netherlands, Enschede / Remote (Apr 2024 - Sep 2025)

The Quick Sport is a platform that facilitates sport opportunities for athletes that do not want to commit to a club, gathering athletes together, and managing the events organization.

- Set up the RESTful API and development conventions that are used across the project up to this day supporting **500+ monthly active users** and enabling faster onboarding of new developers.
- Set up the CI/CD pipelines for testing, building and deploying the application.
- Transferred the application from Heroku to AWS, provisioning the infrastructure using Terraform that still serves as the main configuration, reducing hosting costs by **30%** and improving system uptime to 99.9%.
- Introduced the component hierarchy which allowed for seamless component reuse and easy navigation, following the best principles of CBSE.

Tech Stack: Vue.js, Express.js, Node.js, MongoDB, Redis, Git, Docker, Docker Compose, Heroku, AWS, Terraform, Redis Queue, OAuth2

Self-Employed | Software Engineer & Team Leader | (Sep 2022 - Present)

Me and a team of Software Engineers were working across multiple fields developing web, desktop and mobile applications as freelancers.

- **Pentas Moulding** - Implemented a detection system using a camera and a YOLO model to recognize and count required components in real-time, issue alerts for missing items, and integrated a configurable web interface with dashboards for monitoring and seamless production flow control, **reducing the percentage of faulty moulds from 7% to 2%**. Integrated the system with the production process.
- Designed & led the development of AI powered Chatbot with (200 daily users at its peak), and many Web Applications (multiple websites, also those in my portfolio)
- Designed & developed messaging communication between services utilizing message brokers such RabbitMQ. Implemented many load distribution and balancing patterns.
- Developed the web call application using WebRTC with self set up media servers.

Tech Stack: Java 17, Kotlin 2, Spring 6, Spring Boot 3, RabbitMQ, Kafka, Express.js, Node.js, Svelte, React, Python 3, FastAPI, PostgreSQL, SQLite, Git, Docker, Hibernate, JUnit, Mockito, C++, WebRTC, YOLO

EDUCATION

Bachelor of Information and Communication Technology | Saxion University Of Applied Sciences (Netherlands, Deventer Sep 2023 - Present)

Currently pursuing a comprehensive curriculum in software engineering, emphasizing hands-on experience in software development, data structures, algorithms, and computer systems, participating in collaborative coursework that enhances teamwork skills.
